

Live tracking – mounting instructions

Dear Sailors

The St Barths Bucket Regatta will be tracked live via TracTrac's live tracking system that allows spectators and fans to follow the excitement of the racing live during the event and allows you to replay and relive the race when you are back on shore. Go to www.tractrac.com and click on the event to watch the tracking. There is also a free app available to download for Smartphones and Tablets (IOS and Android).

Each yacht being tracked will carry a tracking device (60 grams).

The tracking device will be collected each morning before the race, and must be returned to the race office afterwards, to be charged fully overnight.

Mounting the device

The tracking device comes in an aquapac with a rope-tie or carabiner and is recommended to be **attached to the boat on the sea rail, or centrally, at the back of the boat, clear of any obstructions or other instruments, in clear view of the sky (for satellites) and above the Waterline**

Attach the device into position at the rear of the boat.

Secure with cable tie or tape, so it does not hang loosely or bang around.

Usage

Do NOT open the water proof plastic bag under any circumstance – the tracking device is NOT waterproof.

DO NOT press any buttons (the unit will turn on automatically).

Watch tracking live or in replay via www.tractrac.com, or from smartphones and tablets using our free App.
