

**2024 St Barth's Bucket
Notice 2**

Observed Performance Factor (OPF) yacht Sunleigh

4% Light Wind Range / 7% Strong Wind Range

Yacht Name	Light	Light-Mod- erate	Moderate	Moderate- Strong	Strong
Sunleigh	655.0	515.5	440.8	401.4	380.6

In accordance with ORCsy Rule 307.1 b), a yacht's rating may be adjusted by an Observed Performance Factor (OPF). OPF is adjusting time allowances for yacht's performance for light and strong wind while effect on the wind ranges in between is calculated proportionally between light and strong wind. It is expressed in percentage of modification of time allowances. OPF may be applied between regattas or between races at a regatta by the ORC Rating Office when there is evidence from race tracking data and/or from observed performance and timings that the yacht's elapsed time (for a race or part of a race) is significantly different from that predicted based on the rating allowances published on the certificate.
